a
Entropic barrier (α-Hemolysin)
sphere
optimal rod
disc
PMF G(z) (k_BT)
axial position (nm)
b
Translocation barrier
barrier ΔG‡ (k_BT)
α-Hemolysin
VDAC1
Connexin-26
MspA
c
Driven translocation (α-Hemolysin)
translocation prob.
drive f (k_BT/nm)
d
Rod: more cargo, no barrier penalty
capacity gain (x)
entropic barrier ΔG‡ (k_BT)
circle: sphere → square: rod
